Slit Lamp

Providing all the basic functions of slit lamp, it is equipped with the Excellent optical performance, making it possible to observe all structures in fine detail

Tower Illumination
Traditional Slit Lamp

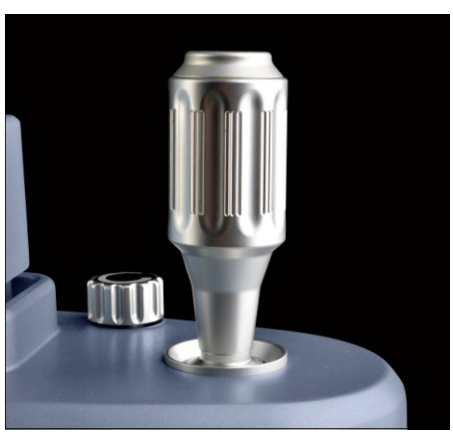

Built-in Yellow Filter

Built-in yellow filter along with cobalt-blue filter increases the contrast of Sodium Fluorescein Staining image. Increase positive rate of early corneal epithelial staining

Metal Decoration Appearance

Magnification select dial, Chin-rest elevation adjustment knob, joystick are made by metal material, enhance the metallic finish

Slit Lamp

Five-step drum magnification for eyepiece. Sclera vein could be observed under the 40x magnification
All the optical lenses are moistureproof, mildewproof and anti-reflected treated
Large spot diameter, slit length reach to 14mm, more comprehensive view of the eye condition
Multi-coated optical glass technology, imaging is clear and bright, the view field is wide
Brighter LED illumination enhances observation of the eye structures
All the joints can be connected by accessories with international standards

LED Light Source

LED illumination provides bright and sharp illumination
Comfort to the patient during the examination due to the lack of heat

Lower Illumination
Traditional Slit Lamp

- 3 or 5 step magnification (10x, 16x, 25x) or (6x, 10x, 16x, 25x, 40x)
- Our LED has been carefully selected for its performance, with a colour temperature of 3,500k, and a truly homogeneous light patch. Typically, a LED will provide 10,000 or more hours of life

Digital Slit Lamp

Available add-ons: CCD, Kapture software

The digital module is specifically developed for anterior segment imaging examination environments, featuring automatic exposure, automatic white balance, wide dynamic range, and high sensitivity-all without requiring any parameter settings

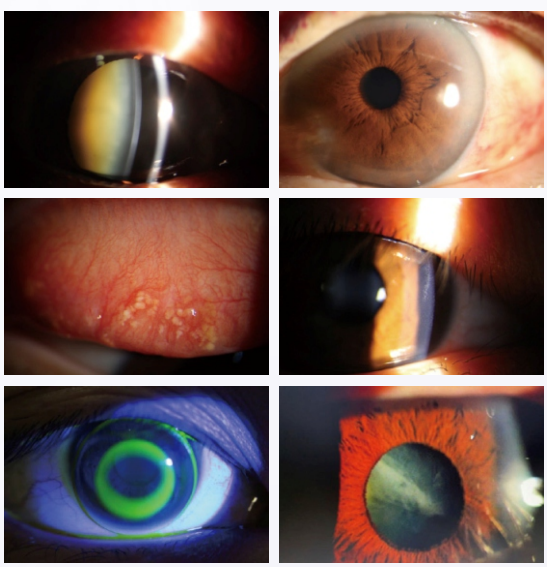

BL-99C Panorama

Easy Installation

Integrated Metal Plate design-Abandoned traditional power box, Applied adaptor for power, Make it easy to install with combined table and moveable

Digital Slit Lamp

- Real-time dynamic display
- Clear and lifelike images
- Fast image acquisition speed
- Just press the lesion area lightly and a clear picture will be captured immediately

High-performance

BL-99D Digital Slit Lamp

Available add-ons: digital camera, Kapture software

BL-99D Panorama

CONFIGURATION

Digital 24 Megapixels DSLR camera
Automatic exposure
Automatic optimization
Automatic eye position recognition
Illumination background light
1080P dynamic video
